

Instructions for Labs

Modified Green Surgery Cage Tags

SURGERY

Handle gently!

SX date (Day 0): _____

Remove this tag after 7-14 days

LARC scan Day 0

Post-OP Monitoring:
Write in date and initials below after you monitor post-surgical animals.

Date Initials

2 Day 1: _____

3 Day 2: _____

LARC scan if blank

Use one green card for each surgery day (a cage could have more than one card with different dates)

- 1) Fill out the surgery date and affix to cage as usual (can be taped or placed in card holder)
- 2) Check your animals the day after surgery and initial and date Day 1
- 3) Check your animals the following day and initial and date Day 2

If the emergency contact is someone other than the cage card contact, indicate on the back of the card. This can alternatively be posted at the room or rack level.

Postoperative Care Contact:
(If different than cage card contact)

Name _____

Cell _____

LARC will scan and an email notice will be sent to protocol contacts if observations are not recorded.

This does not replace the surgical record. Continue to document all post-operative treatments and abnormal observations on the surgical record as per your protocol.
